

WEEK10MCQSPRING

- Which of the following is correct regarding RESTful webservices?

A. @Controller @RequestMapping("/employee") public class EmployeeController	B. @RestController @RequestMapping("/employee") public class EmployeeController
C. @RestApi @RequestMapping("/employee") public class EmployeeController	D. @RestfulWebService @RequestMapping("/employee") public class EmployeeController
- How to use ref keyword in bean.xml?

A. Using setter method only	B. Using constructor argument only
C. Using setter method and constructor argument both	D. None of the above
- <http://localhost:8080/employee?id=100>
Which of the following annotations, is used to obtain the value of the query string "id"?

A. @PathVariable	B. @PathParam
C. @RequestParam	D. @QueryString
- Which of the following is correct while configuring web security? (Choose two)

A. implements WebSecurityConfigurer	B. extends WebSecurityConfigurer
C. implements WebSecurityConfigurerAdapter	D. extends WebSecurityConfigurerAdapter
- Which of the following can be a return type in a spring MVC controller method? (choose two)

A. String	B. Model
C. View	D. ModelAndView
- What is the commonly used eureka server port number?

A. 8080	B. 8765
C. 8761	D. 8617
- In Spring AOP, How after-throwing advice works?

A. Run advice after a method execution only if method exits by throwing an exception.	B. Run advice after a class loads only if class throws exception during load time.
C. Run advice after http response is returned with error status.	D. Run advice after http request is processed and an exception occurred.
- While making request to a REST api, you want to pass the JWT token in header. Which of the following header is used for that?

A. Authentication	B. Authorization
C. Impersonation	D. Authenticate
- You want to provide documentation for RESTful web service you have created, which of the following will be useful for that?

A. Docker	B. Swagger
C. SonarQube	D. Junit
- Spring AOP module is used for?

A. Cross cutting concerns	B. Spring security
C. Database connectivity	D. Web applications
- Which of the following can be used in handler methods using the @RequestMapping annotation?

A. HttpServletRequest	B. @RequestParam
C. @ModelAttribute	D. All of the above
- While accessing the spring boot REST api from Angular, you are getting error: 'http://localhost:4200' has been blocked by CORS policy: Cross

origin requests are only supported for protocol schemes

Which of the following will help to solve this error?

- A. `@CrossOrigin`
- B. `@EnableCORS`
- C. `@EnableOrigin`
- D. `@CORSOrigin`

13. Which of the following is not used while configuring an Eureka server application?

- A. `@EnableEurekaServer`
- B. `eureka.client.registerWithEureka`
- C. `eureka.client.serviceUrl.defaultZone`
- D. `eureka.client.fetchRegistry`
